

GIVING A PRESENTATION

Giving A Poster Presentation

What you'll be doing

- Poster presenters will stay with their posters as people walk around viewing the posters
- Answer any questions the attendees may have

Design and print out your poster

Posters are a textual and visual way of presenting information. See the "creating a poster with powerpoint" for specific advice/guidance.

Develop an answer to "tell me about your research/poster?"

Very common question - nice to have a canned response.

Giving An Oral Presentation

What to expect on presentation day

- Oral presenters will be placed on a panel with 2-3 other students
- Each person will have 8-10 minutes to present their powerpoint or video

Prepare a powerpoint slide or video

- Consider your audience
- What is the theme or "take-home message" that you want to communicate?

Practice your presentation

Not everyone is good at public speaking or like to do it. Get together with some friends that you trust and practice your presentation with them.

Rock your presentation!

The people at your presentation want you to do well. Don't fret and enjoy telling them about your research.

Schedule a 1-1 appointment to get started or to get feedback about your presentation : <http://bit.ly/12qd6MU>
